

Presentation Skills.

1:1 Executive Presentation Coaching.

Overview.

This 1:1 coaching delivers a condensed alternative to our 2 day presentation skills program. Customised for delivery to a C Level audience and typically coached by a Partner or Principal from the business. Delegates will discover that everyone is able to influence with power. For some, this is natural and you literally feel their presence the minute they enter the room. For others, reading a scripted speech poses a challenge, and although they are naturally strong confident individuals, expressing this publicly in front of peers somehow doesn't feel comfortable, especially in high stakes situations. So what is the difference? Some people call this "Charisma", some call it "Confidence", some call it "Gravitas".

Challenges addressed.

- Presenting reports to management teams and boards
- Presenting at corporate dinners and product launches
- Presenting recommendations to internal and external committees
- Delivering motivational messages to an audience
- Presenting changes to employees

Outcomes.

- Pragmatic tools to augment current skills in planning presentations, analysing the audience, creating key messages, and presenting confidently in front of small or large audiences
- The skills to tailor the structure, content and delivery of presentations in the most persuasive manner for each audience, environment and presentation objective
- A greater appreciation of the value of rehearsal including techniques to effectively rehearse prior to a high-stakes presentation

Who should attend.

Anyone who needs to confidently persuade small or large audiences in high stakes environments, such as management teams, boards of directors, government and conferences.

Duration.

2 hour coaching session for 1 delegate (would strongly recommend 2-4 sessions in order to ensure sustainability)
